Mr. Sam Nelson  
Kay Communications, Inc.  
3307 E. Napoleon Street  
Sulphur, LA 70663

Dear Mr. Nelson:

It has been our pleasure to provide a test site for your software, SystemVu, Version 2.

We had been looking for a software package to integrate our Cimmaron Technologies MDC1200<sup>®</sup> decoders with a personal computer/server platform to provide logging and display functions. Fortunately, we found SystemVu.

This easy to configure and use software package provides a radio manager or dispatch center a wealth of information that they can use to either monitor their system or help their users. The features of the software, from simple push-to-talk display to activity logging, are very easy to use and will make my job that much easier.

This software, which will be used in our Emergency Operations Center as well as our backup dispatch center, has the features that I would have requested if I were to write a software package from scratch. Happily for me, I found SystemVu, Version 2.

Should you or others have any questions, please feel free to contact me.

Sincerely,

Scott Wright, Chief of Service,  
Durham Volunteer Ambulance Corps, Inc.

Communications Coordinator,  
Town of Durham, CT
